Reference: Lord-Shope RD/RA Monthly Progress Report

Dear Mr. Turner:

Lord is hereby submitting five copies of the monthly progress report for January 1994.

The following work was conducted during this period:

REMEDIAL DESIGN/REMEDIAL ACTION

Lord and the USEPA RPM discussed the protocol for submittal of wetlands permit applications. Applications will include special forms for Historical Clearance (No. EROF06) and Artifacts, Rare Plants and Species (EROF07). Both Forms are dated May 1993. An Erosion and Sediment Control Plan will also be required. The actual permit will be submitted to the PA DER Division of Dams and Waterways who will subsequently forward the application to the Soil Conservation Service in Waterford, PA (Mr. William Staff). Lord understands that USEPA and their consultant, E & E, are engaged in the process of reviewing the RD. A timely review is planned by USEPA.

MISCELLANEOUS

The monthly inspection was performed and the site is in good condition.

Lord has now received a response from Over Lake regarding our offer for a proposed agreement for access during the construction phase of the Remedial Action. Over Lake did not respond directly to our access offer, but Over Lake did make a series of proposals for settlement of the claim as well as access. Lord responded with some questions on the proposal and have not

received a response from Over Lake to date. Lord may need USEPA assistance to obtain access if this matter is not resolved before USEPA approves the RD.

Lord was advised by the USEPA that a Public Meeting will be held once the RD has been approved.

Yours truly,

LORD CORPORATION
